

Demag in steel

"At AUSREO we manufacture concrete reinforcement products to the highest standards, so when it comes to moving them around, we need and rely on the very best lifting equipment money can buy. That's why we chose Demag cranes. You should phone them for an obligation free assessment by one of their experts."

It makes sense to get the best. Contact Demag Cranes & Components today on 1300 Demag1 (1300 336 241) or sales@demag.com.au.

For any business, any space or any task, if you want to lift and move it, then lift and move it with Demag.

"In today's world you need a supplier you can trust to be there tomorrow"

Peter Scott
General Manager
Ausreo

Demag in support

"At CROWN, we know about lifting things in difficult environments. We spend our life designing, engineering and manufacturing our award-winning line of electric lift trucks. So when it came time to finding the right lifting system for our factory, we chose the best; We chose Demag.

You should phone them for a free VideoCD and /or literature or an obligation free assessment by one of their KBK experts."

It makes sense to get the best. Contact Demag Cranes & Components today on 1300 Demag1 (1300 336 241) or sales@demag.com.au.

Demag in service

"At Kimberley Clark we don't want just anyone to service our Demag cranes and hoists. It makes sense to have them serviced by the experts. Demag have an Australia-wide service network with factory trained engineers to keep your cranes & hoists working."

We're on call 24 hours a day for:

- Breakdown Service
- Re-certification & refurbishment
- General overhaul – rope hoists
- Installation & commissioning
- Safety inspections
- Preventative maintenance
- Fault finding & repairs
- Product & operator training
- Genuine spare parts

It makes sense to get the best. Contact Demag Cranes & Components today on 1300 Demag1 (1300 336 241) or sales@demag.com.au

For any business, any space or any task, if you want to lift and move it, then lift and move it with Demag.

"I chose Demag service because they were on-time, on-budget and on-call"

Jeff Burke
Engineering Coordinator
